

SPECIFICATIONS "58" FILTER

- Cartridge Dimensions: 20" x 4.5"
- Filter Type: Sediment filter - pleated
- Micron Rating: 20 Micron
- Replacement: Approximately every 12 months
- Temp: 4°C-38°C
- Flow Rate: 76 lpm at 1PSI of clean pressure drop

SPECIFICATIONS "110" FILTER

- Cartridge Dimensions: 20" x 4.5"
- Filter Type: Activated carbon with silver
- Micron Rating: 5 Micron
- Replacement: Approximately every 12 months
- Temp: 4°C-38°C
- Flow Rate: 56 lpm at 1PSI of clean pressure drop

BHOUSE- Whole House Filtration

Designed to meet the needs and requirements of a modern whole house application. The BHOUSE system provides clean and clear drinking, shower, bath water, whilst protecting hot water services and water consuming home appliances.

The BHOUSE is a twin staged filtration unit to achieve varying tasks required in a home application. The first filter reduces dirt, sand and rust particles (down to 20 microns) and the second filter is a 5-micron granular activated carbon that reduces chemicals, tastes & odours.

Filter life will depend on the incoming water quality. The sediment filter can be rinsed off every few months and lasts approximately one year. The carbon filter requires changing "as required".

It is recommended to have a qualified plumber fit the system, and a pressure limiting valve should be fitted (if it isn't already, most new homes have them fitted standard).
